You Can Learn to Move More

To make new daily routines, you need to **experiment** to find what works best for you.

Pick something you want to do now.

I want to try:

Be honest with yourself about what you are really ready to work on.

You'll learn what works for you by trying and creating your own formula.
Follow the steps below.

1 Make a Plan. Planning out the details will help you succeed.

Pick a small step

Pick a small step toward your goal.

Connect this step to a prompt or reminder.

Prepare

What resources could help?
(Time? Gear? A class?)

Who will support you?
(A friend? A family member?
A fitness professional?)

What changes to your environment would help?
(Keep workout bag packed?)

Think ahead

What might get in the way or make this harder?

What can you do when that happens?

What will inspire you to keep going and have fun?

2 Act and Track. Try out your step for a defined period.

Start date: _____ How will you keep track of what you do? _____

Review date: _____ Who will you be accountable to? _____

3 Reflect and Adjust. You can learn from whatever happens. There's no failure if you keep learning. Adjust your plan and keep going.

How did it go, and what did you learn? _____

What will be your next small step? _____

Be sure to celebrate what you did and what you learned!

Keep trying and learning!
